

HackElect

Hack The Electricity

Be a part of the 1st hackathon in Slovenia, related to Smart Grids and data methods for power engineering.

LOCATION

Faculty of Computer and Information Science, Ljubljana, Slovenia

DATE

October 7 - 8

FUND

10.000,00€ + job opportunities

TEAM

3 - 6 members

POWERED BY

5 CHALLENGES

-  Thermography and IR processing
-  Lightning Scalar web and mobile application
-  Scalar backend system implementation
-  IoT aware intelligent IP network's behaviour prediction
-  Smart metering electricity data analytics

Develop advanced **solutions**, create new **products** and master your **skills!**
